May 2025 — The Sixth Month of the Project

Milestones

INTELLIGENT Website With Insights Hub

The INTELLIGENT Project has launched its full website with Insights Hub in May 2025. This is a major milestone in our mission to advance peer-to-peer (P2P) energy and flexibility trading across Europe through cutting-edge innovation.
Originally launched in a basic landing-page format, the website now features the complete structure envisioned from the start – including all key project pages, tools and resources.

At the heart of the site is the Insights Hub – a central space for accessing: validated project results, technical outputs, pilot site findings, reports, publications and other project deliverables. The Insights Hub will be continuously updated to enable knowledge transfer among project's stakeholders, such as energy communities, researchers, grid operators and policymakers. Stay tuned for more project results in the following three years, since this is only the beginning of the Insights Hub!

Explore the website at: https://intelligent-project.eu/

Events

First INTELLLIGENT General Assembly in Cologne, May 6–7

The first General Assembly of INTELLIGENT has been successfully completed!

Over two intensive days – May 6–7 at Schloss Wahn in Cologne – project partners came together for presentations and discussions dedicated to our shared goal: developing an open-source platform for peer-to-peer energy trading and flexibility management. You can read the meeting report together with all the topics covered here.

A big thank you to our project coordinators R2M Spain for organising the event, together with our gracious hosts, University of Cologne.

Deliverables

First Round of INTELLIGENT Deliverables Completed

May 2025 marks the successful completion of the first round of public deliverables under the INTELLIGENT project. These documents reflect the project's progress in both technical development and strategic planning.

This initial set of deliverables includes:

- D2.2: Regulatory Analysis of P2P Energy Trading Models
- D2.4: Project Requirements, Solution Design and KPIs
- D4.1: FOS Prediction Module (GitHub, with docs) v1
- D4.2: FOS Optimisation Module (GitHub, w/docs) v1
- D7.1: Dissemination, Exploitation & Communication Plan v1.

All documents will soon be made publicly available through the Insights Hub on the INTELLIGENT project website

---

Synergy

INTELLIGENT Fetaured in The BRIDGE 2025 Brochure

We are proud to share that INTELLIGENT is featured in the EU's BRIDGE 2025 Brochure as one of the highlighted projects. The publication presents detailed factsheets on Horizon 2020 and Horizon Europe projects in the areas of smart grids, energy storage, islands and digitalisation, with a special focus on their collaboration efforts. INTELLIGENT is showcased on pages 110–111, alongside many other EU-funded initiatives.

Take a look to explore the scale and impact of the BRIDGE ecosystem here.
